

All Dutch wind turbines together ...

... supply as much power as the 'Amercentrale' power plant

**3,727,000 tonnes CO<sub>2</sub>  
2,300 tonnes NO<sub>x</sub>  
40 tonnes PM<sub>10</sub>  
700 tonnes SO<sub>2</sub>**

**21 PJ  
Electricity  
(+ 3.7 PJ Heat!)**

The Amercentrale is fuelled for 65% by coal and for 35% by biofuel in the form of wood chips.
